

Just arrived – new vans!

You'd be forgiven for thinking our Otterbourne office has become a Toyota dealership over the last few days, thanks to the delivery of six terribly smart, medium wheel base, Euro6 compliant Proace vans. The necessity for a brand-new fleet has been spurred on by the increase in demand for our services; it's the busiest we've ever been!

When choosing our new fleet, environmental impact was top of the agenda. The Proace's clever Selective Catalytic Reduction (SCR) system – used for converting Nitrogen Oxides (NOx) into Nitrogen and Water – is keeping Anchor ahead of the competition when it comes to environmentally-friendly practices. Thanks to the SCR system, the exhaust emissions are actually cleaner than what went in! The 'old' vans may be slightly envious of their new team members' all-singing-all-dancing features but the old faithful's will be staying in service for quite some time yet!

Keep your eyes peeled for our shiny new liveried vans and be sure to give them, and the old-faithful's, a toot!
