

Another year and another accreditation; we are thrilled to announce – for the second year running – we have been awarded Carbon Smart Gold Certification. As always, this award is presented only to those who make conscious, meaningful, business-smart actions to reduce their carbon footprint. It certifies that our intelligent and flexible approach to reducing our environmental impact has paid off, even though we’ve had a significant increase in staff headcount and turnover! Going forward we will continue to demonstrate and fulfil our commitment to customers, staff and suppliers by forever being Carbon Smart!
