

Anchor engineers have worked with Holiday Inn on their service and maintenance works since July of 2014, keeping all the LPG boilers and hot water systems serviced and maintained. Engineers are regularly called to attend to mechanical and electrical breakdowns in the building as well as giving support to in house team on technical issues.

Looking to the future this 4 star luxury hotel (with AA Rosette restaurant) based in Winchester are looking to significantly reduce their energy costs with energy saving refurbishment projects.

James, Holiday Inn Maintenance Manager says “Anchor are a revelation for us - when we ring them with a problem, they always turn up that day and the problem is taken in hand and resolved.”
