

Here at Anchor, we are proud to announce that we have been awarded with the industry recognised quality standard ISO 900:2015 certification.

To be awarded with this prestigious accreditation we had to demonstrate that our services meet the needs and expectations of our clients, via the implementation of our effective quality management system (QMS). This entailed Anchor undergoing an evaluation process that included QMS development, a management system documentation review, pre-audit, initial assessment, and clearance of non-conformances – all of which work to identify corrective actions that eliminate non-conformance to the QMS.

This is by no means a small evaluation for any company to undertake which shows our commitment to providing a high-quality and consistent service to our clients.

Our MD, Ian Paxton was quick to congratulate the team, saying “Anchor has always placed our customers at the heart of everything we do, so it’s really good to have this recognised by such a prestigious accreditation – well done team!”

With our dedication to constantly improve, develop and maintain our ISO 9001 accreditation, our clients can be assured of an ongoing top-class service, striving to always provide what they expect and more.
