

March has seen the successful renewal of our OFTEC registration!

So, what is OFTEC?

OFTEC, or the Oil Firing Technical Association are, no surprise, an association dedicated to ensuring that those maintaining and fitting oil fired systems and appliances are fully trained, compliant and competent to carry out the work.

Over a million UK homes are currently using oil to heat their homes; it's an ideal choice for those who are not connected to, or are unable to connect to mains gas - not to mention that oil systems are cheaper to run than LPG systems and are cleaner than solid fuel systems.

It's important to remember that, when it comes to maintenance of your oil-fired system, OFTEC approved engineers are the way to go. If you're thinking of renewing your oil-fired boiler or oil storage tank, you must use an engineer who is OFTEC registered...the obvious choice for maintenance and installation therefore is Anchor!
